MR. RATCHET™

Ratcheting Screwdriver

Lifetime Warranty

Feature	Benefit
• Designed, patented and made in U.S.A.	• Confidence of purchasing a high quality, made in U.S.A. product
• Self lubricating, two position, hardened steel ratcheting mechanism	• Ratcheting mechanism can withstand such high torque (in excess of 15 ft-lbs) that a fixed, non-ratcheting setting is not required
• Three sided ergonomic inner handle made of Butyrate	• Handle geometry provides comfortable grip for all hand sizes, Butyrate material provides strength, durability and abrasion resistance for long life
• Soft vinyl, motorcycle grip outer handle	• Comfortable, non-slip gripping surface
• Drive shaft made of heat treated, nickel plated steel	• Strong, corrosion resistant drive shaft
• Bits made of heat treated chrome vanadium steel	• Heat treated steel provides strength to withstand high torque and resist wear
• Ball-detent bit design (non-magnetic)	• Non-magnetic design allows use on sensitive electronics (will not damage electronics)
• Bits are stored in shaft end of driver handle	• Bits are easily accessible and always visible
• Available in various bit and bit/nutdriver combinations	• Combinations designed to suit a wide range of application needs
• Bit replacement program	• Customer can replace broken bits and/or add on to bit set at a reasonable cost
• Sold in marketplace in excess of 20 years	• Confidence of purchasing a time tested, market proven design
• Lifetime warranty on screwdriver	• If screwdriver found to be defective it will be replaced at no cost
